

Group 13 Meetings

9/14/2026

Described use cases from project document, vaguely talked about assigning work (waiting until the entire group is together): actors described, specific tasks, etc.

- Described what is expected of each member, work wise. (How do we define if work is properly completed/weight is pulled by each member?)
- Members present: Mae, Connor, Wyatt
- Documents were shared with members who couldn't make it.
